**Oil & Gas/Refining & Petrochemical
Power & Renewables**

Q4 2010

**Focus on Spike in Oil
Prices, Natural Gas, Brazil**

Every quarter the Energy Monitor shines its spotlight on the oil & gas, refining & petrochemical, and power & renewables industries looking for important events to discuss or highlight.

We find the events, report them, and place them in the context of the flow and instrumentation industries. The Monitor explains and interprets the importance of capital spending forecasts, the construction of new refineries and plants, and new regulations that affect the need for more instrumentation.

The Energy Monitor gives you the information you need for forecasting, marketing, and making decisions on product features in the flow, temperature, pressure, and valves industries.
